### TRACK 2: 12:30 – 1:30 PM

#### SESSION 1 ROOM 150A

##### 5G 12:30 – 1:30 PM

**Chair/Moderator:** Jeffrey Booth, U.S. Department of Homeland Security

#### **Panel Session: 5G Reality Check: Deployment, Safety, Security**

*The next generation of high speed, low latency network known as 5G is steadily rolling out across the United States, and around the world. For municipalities, much needs to be done to ready infrastructure to deploy 5G. This “densification” effort is complex and takes investment in time and resources. Upcoming high bandwidth capabilities offer new opportunities in public and private services, public safety, transportation and more. Data ownership, privacy and management are now areas local governments need to navigate. Security of networks as they become more interwoven and vulnerable through an expanded threatscape of IoT devices becomes of paramount importance.*

*This panel discussion will address key questions facing the public sector as it deploys 5G, including: Why the public sector should care about 5G infrastructure and utilization. How municipalities can gain the most from such deployment while keeping in mind lessons learned thus far. Managing the conversation with municipalities and communities regarding 5G deployment impact on health, aesthetics and other questions. How to manage supply chain risk and security. The implications of shared spectrum. Data ownership and management. Securing 5G network hardware and software. The impact of 5G on public safety from location to First Responder support.*

#### **Panelists:**

*Moderator: Jeff Booth, DHS Science & Technology Directorate*

*Keith Gremban, Director of the Institute for Telecommunication Sciences (ITS), NTIA*

*Jim Houchens, Chief Engineer, Intelligence Programs, MITRE Corporation*
